

CONTROLLER's weapi paths

- `http://<controller-url>/api/v1/algorithms`
 - **GET:** `http://<controller-url>/api/v1/algorithms`
 - **returns** all the available algorithms. In what form... TBD → depends on the inputs needed by each algorithm
 - **GET:** `http://<controller-url>/api/v1/algorithms/{algorithmName}`
 - **returns** some representation of the algorithm. In what form... TBD → depends on the inputs needed by each algorithm
 - **POST:** `http://<controller-url>/api/v1/algorithms`
executes an algorithm
data → `{"algorithmName":<algoName>,"tableName":<tableName>,"attributes":<attributes>,"filters":<filters> }`
retruns the numeric results
